THE STANDARD SETTER
A NEW GENERATION OF MILITARY
AIR MOBILITY DEMANDS A NEW STANDARD
The KC-390 Millennium is the true multi-mission aircraft, bringing performance, versatility and operational efficiency together in one advanced platform. Built to meet the evolving demands of modern air forces, it is redefining expectations for military air mobility.
The standard has changed. The KC-390 Millennium is setting it.

Major conflict in the Middle East resulted in high-profile aircraft losses for Iran, the US and several regional allies. Our annual review of the global military fleet details the key developments

Hard hitting

Craig Hoyle London / **Data partner: Cirium**

US-led military activities dominated in 2026, with notable campaigns affecting nations in Latin America and the Middle East.

The year had barely begun when US special forces conducted an audacious raid during the early hours of 3 January to capture and extract Venezuelan President Nicolas Maduro.

Dubbed Operation Absolute Resolve, that action involved Boeing MH-47G and Sikorsky MH-60M helicopters, supported by a large package of combat aircraft which struck targets including air defence infrastructure.

Houthi rebels pose with a downed Saudi Arabian F-15SA

UPI/Shutterstock

That smash and grab incursion was soon followed by a much more substantial conflict, as the US and Israel on 28 February launched major strikes on Iran. Washington labelled its war Operation Epic Fury, and during its opening hours Iran's spiritual leader Ayatollah Ali Khamenei was killed amid large-scale attacks on Tehran.

The Islamic Republic did not collapse as anticipated, however, instead launching retaliatory attacks against US forces and Washington's military allies in the Middle East. That included a high-profile strike mounted against Saudi Arabia's Prince Sultan air base, which destroyed a number of US support aircraft, including one of the US Air Force's (USAF's) Boeing E-3 Sentry airborne early warning and control jets.

Friendly fire

Other notable moments included a Kuwait air force Boeing F-18 pilot shooting down three USAF Boeing F-15Es in a 'friendly fire' incident, and a massive combat search and rescue (CSAR) mission mounted to save the crew of another F-15E which had been downed inside Iranian territory.

While both crew members were ultimately extracted alive, several US aircraft – among them two Lockheed Martin MC-130Js and four Boeing MH-6 Little Bird light attack helicopters – had to be destroyed after the transports became stuck in soft ground during the rescue mission.

US forces destroyed stuck MC-130J during crew rescue inside Iran

Total	**52,160**	**100%**

Data source: Cirium

The pilot of a Fairchild Republic A-10 also was recovered after their jet was downed during the CSAR effort. The US also had seen at least 45 uncrewed General Atomics Aeronautical Systems MQ-9 Reapers destroyed by late-September, and in all, at least 81 of its aircraft had been lost or damaged, also including seven Boeing KC-135 tankers.

While the US and Israel claim to have "obliterated" their foe's military aviation assets, the exact detail of Tehran's losses cannot be verified, meaning our fleet listing for its forces may not fully reflect conditions on the ground.

Less ambiguity exists in Yemen, however, with the Middle East nation's entire inventory having been taken out during offensive action mounted by Houthi rebels. That has seen 160 previously operational aircraft removed from our global fleet listing: 68 combat aircraft; three transports; 59 combat helicopters; and 30 training aircraft/helicopters.

In another significant development, a Royal Saudi Air Force F-15SA was shot down by the Houthis in mid-September using a surface-to-air missile, marking their first such successful engagement.

Yemeni attrition

The removal of Yemen's military aircraft fleet follows a similar upheaval inside Syria, which disappeared from our rankings in last year's report, marking the loss of its 414 aircraft.

Meanwhile, Ukraine has maintained its defence against Russian invasion, with Kyiv continuing to repel Moscow's aggression which started in February 2022. While day-to-day operations are dominated by the use of one-way attack and first-person view drones, plus cruise missiles, air power continues to play a key role on both sides.

Our full listings show that Ukraine has 359 aircraft in active use – a year-on-year rise of 12 – while Russia has 4,186 (down 51). Their mismatch in equipment numbers is particularly stark in the combat aircraft category, where Kyiv can draw on 128 strike aircraft, versus Moscow's 1,509.

However, the Ukrainian air force is receiving more donated Lockheed F-16s, while the nation advances on planned purchases of both Dassault Aviation Rafales and Saab Gripens.

Prepared using information from data partner and aviation analytics company Cirium, our 2027 directory lists a total of 52,160 aircraft in active use with 160 nations. That represents a net reduction of 71 since our previous report, but that topline figure masks some significant changes recorded during our review period.

Our combat aircraft total of 14,517 is an increase of 443 year-on-year, largely due to updated reporting of China's inventory.

That gain was balanced overall by significant reductions in two other categories: the combat helicopter figure declined by 202, to 19,947; and training aircraft/helicopters dipped by 218 aircraft, to 10,857.

Two of our reporting regions show net increases from last time: the Asia-Pacific total climbs 4% to 15,287 (up 606), and Europe rises 1% to 7,895 (up 113).

All other regions experienced a year-on-year decrease: Latin America -1% (2,888; down 32); Africa -2% (4,175; down 82); Russia and the Commonwealth of Independent States (CIS) (4,941; down 77); North America -3% (13,009; down 378); and the Middle East -5% (3,965; down 221).

Chinese strength

Notable fleet adjustments made by Cirium regarding China's military strength have seen Beijing's total rise by 650 aircraft, to 4,179.

Improved data is included for the People's Liberation Army Air Force's Chengdu J-10, Shenyang J-11/15/Sukhoi Su-30, and Xian JH-7 fleets, while we estimate its Chengdu J-20 strength at 300 examples. Increases also are recorded for the navy's J-11/15/Su-30 and JH-7 units.

China's obsolete Nanchang Q-5s have been deleted from our ranking, removing 118 of the aged jets.

Elsewhere, Australia's army has welcomed its first nine of 29 Boeing AH-64E Apaches, while removing 21 Airbus Helicopters Tiger armed reconnaissance helicopters from use.

Procurement activity included Indonesia signing for a dozen Leonardo M-346FA light-attack aircraft, with future contracts potentially to follow in Bangladesh for Eurofighter Typhoons, and Malaysia for Leonardo Helicopters AW149s.

Argentina has received a dozen ex-Royal Danish Air Force F-16s, with another 12 to arrive by 2028... and retired its A-4 Skyhawks

Retirements included South Korea ending operations with seven air force-assigned Kamov Ka-32s, and Sri Lanka standing down eight Mil Mi-24s.

In Europe, Portugal took delivery of its first five of 12 A-29Ns in December 2025, making it the first operator of Embraer's NATO-optimised version of the Super Tucano.

Belgium ordered 18 Pilatus PC-7 MKX basic trainers, along with five Cessna SkyCourier transports.

Spain in December 2025 placed a 100-unit order for a mix of Airbus Helicopters H135s (13), H145Ms (50) and H175Ms (six), and NH Industries NH90s (31) for tri-service use.

Ukraine, meanwhile, is advancing on deals to acquire Rafales and Gripen C/D- and E-model fighters, and also has shown interest in Bell's AH-1Z attack and UH-1Y utility helicopters.

European retirements

Assets to have left use during our review period include Denmark's last F-16s, along with the German navy's Lockheed P-3C Orion maritime patrol aircraft (sold on to Portugal), and the Polish navy's Kaman Aerospace SH-2G Super Seasprites.

In Latin America, Argentina has since December 2025 received a dozen ex-Royal Danish Air Force F-16s in two six-aircraft batches, with another 12 due to arrive by 2028.

That comes as Buenos Aires removed the last of its Douglas A-4 Skyhawks from use; we had 23 of the strike aircraft in our directory last time, along with three trainers.

AirTeamImages

Buenos Aires ended a years-long wait to field advanced fighters

Elsewhere, Guatemala (three) and Uruguay (six) both removed their Cessna A-37 strike aircraft from use, leaving El Salvador, Honduras and Peru as remaining operators of the vintage Dragonfly.

Uruguay had in February 2026 received its first two of six replacement A-29 Super Tucanos.

In Africa, Ethiopia's air force has fielded 10 Irkut Yak-130 advanced jet trainers, via a procurement revealed in early 2026. And in January of the same year, Ghana signed a contract for two H175M medium-twin helicopters.

We note multiple retirements as having taken place, with a total of 50 aircraft removed from Angola's inventory, including its Mikoyan MiG-21 (23); Antonov An-12 (eight); and PC-7 (22) fleets.

Chad retired six H125s, Congo its two Dassault Mirage F1s, Nigeria's air force – which is poised to field Leonardo's M-346 – parked its six Aermacchi MB-339 trainers, and Tunisia stood down its Sikorsky S-61s.

Baku gets JF-17s

Developments among Russia and the CIS states notably included Azerbaijan fielding its first five Chengdu/Pakistan Aeronautical Complex JF-17 fighters and two trainers from a 40-unit buy.

And in September 2026, the Uzbekistan air force took delivery of its first of two Embraer C-390 transports. The Brazilian airframer had in January 2026 identified Tashkent as the jets' previously undisclosed customer, via an order placed in December 2024.

Fleet-size adjustments have been applied for Belarus, trimming its Su-25 entry to 18, from 50 last time, and Russia's air force, where its Su-24 inventory has been slashed to 162 operational examples, from 260 12 months earlier.

Changes in the North America total all stem from developments in the US, where several major type retirements took place.

Data source: Cirium

The USAF said farewell to its Beechcraft T-1A Jayhawk trainers, the US Marine Corps waved off its final Boeing/BAE Systems AV-8B Harrier IIs, and the US Navy gave sunset ceremonies to its Grumman C-2 Greyhound and Bell TH-57 fleets. Combined, those departures totalled some 241 aircraft.

We also note a further reduction in the US Army's AH-64 Apache fleet size – it now has 711 active examples of the attack helicopter, down from 838 last time.

Meanwhile, the service is to employ an expected training fleet of at least 150 Robinson Helicopter R66 light-singles, after selecting M1 Support Services to deliver its Flight School Next capability.

As mentioned previously, much of the Middle East's numbers reduction stems from the removal of Yemen's fleet, but confirmed deletions in Iran include 21 Su-24s and two Boeing 747s previously employed as tankers. Also, Qatar removed its remaining dozen Mirage 2000-5 fighters and trainers from use.

Leading the way

Regarding the global fleet's geographical split, the US accounts for 24%: down a single percentage point from last time. Its total of 12,647 aircraft is greater than the combined strength of second- to fifth-ranked Russia, China, India and South Korea.

Rounding out our Top 10 ranking of nations by fleet size are Japan, Pakistan, Turkey, Egypt and France.

Embraer

Uzbekistan became the fifth nation to receive the C-390 Millennium

24%

Overall US share of the global military aircraft fleet, with its inventory of 12,647 more than three-times that of Russia

Of note, Russia and China each now have an 8% share of the global total, with our listing showing a difference between them of just seven airframes.

Washington retains a significant numerical advantage in all six of our equipment categories, including operating 76% of all active tanker aircraft, 32% of special mission assets and 27% of the combat helicopters in use.

But our updated information for Beijing's armed forces has driven a significant shift in the combat aircraft sector. Indeed, what was last time a 19% to 13% split between first- and second-ranked powers the US and China now reads as 19% and 17%. In terms of fleet size, the figures are now 2,715 and 2,470, respectively: a gap of only 245, and which is likely to narrow further in the near future.

Our annual fleet review excludes aircraft recorded by Cirium as not in day-to-day use, such as assets that are in storage, or undergoing upgrade.

Also omitted are platforms permanently assigned to performing VIP or government transport duties, including with paramilitary/reserve organisations.

We also do not include specialist categories such as calibration, firefighting, satellite tracking, skydiving, target towing, and weather reconnaissance, assets dedicated to experimental or research and development tasks, and where possible have removed training aircraft used by national aerobatic display teams.

Our directory – the initial data for which was drawn on 11 September, with significant updates made until 27 October – also includes information about firm orders for just over 4,700 aircraft, and letters of intent or options for over 4,040 more: the latter are denoted by an asterisk next to a figure in the ordered column.

IF IT'S A TRAINER,
AN ENFORCER
AND A SCOUT...
Meet the aircraft that has more than 625,000 flight hours globally: the A-29 Super Tucano, contracted by 22 air forces around the world. It offers you four different missions on a single platform - Close Air Support, Counter Unmanned Aerial System (UAS), Border Surveillance and Tactical Training - plus the flexibility to switch between them to meet your operational needs. It all adds up to real cost-effective versatility.
...IT'S THE A-29 SUPER TUCANO

EMBRAER

KC-390 MILLENNIUM
THE STANDARD SETTER
FOR CONNECTIVITY AND SURVIVABILITY.
Chosen by leading defense forces, including NATO member nations and partners, the KC-390 Millennium is built for today's complex missions. Designed for enhanced survivability, it combines a comprehensive self-protection suite, armor protection, systems redundances and high speed to outmaneuver evolving threats. State-of-the-art communication suite interoperable with air and ground forces is also integrated, enabling faster, secured coordination. As the most advanced, interconnected platform available, network-centric warfare architecture boosts situational awareness supporting fast decision-making. KC-390 Millennium: the standard setter for modern, multi-mission operations in the most demanding environments.
